UMESH KUMAR MAHTO

Master Of Computer Application (MCA)

As a highly motivated and skilled IT professional, I recently completed my Masters of Computer Application (MCA) and possess a strong foundation in various programming languages, software development, and system analysis. With a passion for solving complex problems and a dedication to continuous learning, I am eager to contribute my technical expertise and innovative mindset to drive impactful solutions in an IT company. Adaptable, collaborative, and with a keen eye for detail, I am ready to excel in a dynamic and challenging IT environment

INTERNSHIP

Junior Software Programmer
Aadrika Enterprises

04/2023   *Ranchi , India*
IIFC Complex, Software Technology Parks of India, GL-3, Namkum Industrial Area, Namkum, Ranchi, Jharkhand 834010

Achievements/Tasks

- Collaborated with a team of developers in a private company specializing in Laravel backend development.
- Gained hands-on experience in Laravel's ORM (Object-Relational Mapping) for efficient data management and retrieval.
- Implemented backend logic and functionality, including authentication, authorization, data validation, and error handling.
- Assisted in optimizing application performance through code refactoring, query optimization, and caching techniques.
- Acquired knowledge of version control systems, such as Git, for collaborative development and code version management.
- Developed and maintained RESTful APIs to facilitate seamless communication between the frontend and backend systems.

SKILLS

Backend Development   Laravel PHP Framework
Core Java   Collection Framework   JDBC
Hibernate/ ORM   Servlet / JSP   HTML/CSS
JavaScript   Rest APIs   DBMS   MySQL
PostgreSQL

PROJECTS

School Management System (04/2023)
- In the School Management System project, I worked as a backend developer using the Laravel framework. The goal of the project was to develop a comprehensive system to streamline various administrative and academic processes in a school setting.
- Developed APIs and endpoints to facilitate data communication between the frontend and backend.
- Utilized Laravel's ORM (Object-Relational Mapping) to interact with the database and perform CRUD (Create, Read, Update, Delete) operations.

Employee Management System using JDBC (10/2023)
- Developed an Employee Management System using Java and JDBC, enabling efficient CRUD operations on employee records. The system provides a user-friendly interface for adding, viewing, updating, and deleting employee information in a PostgreSQL database.

CRM (Customer Relationship Management) (12/2023)
- Designed and implemented a comprehensive CRM system using Java and Hibernate, aimed at streamlining customer interactions and enhancing relationship management.
- Implemented CRUD (Create, Read, Update, Delete) functionalities to manage customer data effectively.

CERTIFICATES

Java Full Stack Course (01/2023 - 03/2023)
Completed a comprehensive Java Full Stack Course with a specification in Backend Development from Anudip Foudation
